

Inspiring green technologies for sustainable future....

EnBio Green Solutions Pvt. Ltd.

(ISO 9001-2015 CERTIFIED)

- Sewage Treatment Plant
- Effluent Treatment Plant
- AMC / O&M

- Bio Cultures For ETP, STP
- Advance Oxidation Plant
- Spares

- MSW/Organic Waste Treatment
- Zero Liquid Discharge
- WTP / Cooling Towers

ABOUT US

Enbio Green Solutions Pvt. Ltd. formed in 2018 Delhi NCR (INDIA) based company, We have prioritized the sustainability and restoration of earth's former glory over the harmful and toxic wastewater treatment plants and techniques. We aim to provide quick and non hazardous solutions for treatment of solid and liquid waste, Solid waste Odor and compost management, Wastewater treatment, Recycle / Reuse, Solar Desalination and ZLD applications in Industries & Govt. Sectors

We are dedicated to Make positive differences in Society and Environment. We are ISO 9001-2015 certified company for maintaining the quality of products and Services.

VISION

Our Vision is to become a world class company in the field of Waste Management technology. We want to achieve the topmost position in the area of Waste Management technology providers.

Inspiring green technologies for sustainable future....

MISSION

Our Mission is to fully integrate environmental stewardship into our business by minimizing waste disposal and maximizing waste recycling and recovery for our customers' waste.

Would you Drink this dirty glass of water??

More than 1 billion people around the world lack access to clean water. More than 2 billion people lack adequate sanitation too. As a result, more than 6000 children are dying everyday. With proper sanitation facility, wastewater treatment is also a great need of the hour.

Enbio green solutions provide sustainable and eco-friendly ways

EnbioGreen Solutions Pvt LTD

has a unique approach of the management with bio-tech equipment expertise to treat water, wastewater and solid waste in the industrial, municipal, commercial or domestic spaces.

011-2610 9411

OUR SOLUTIONS

WATER TREATMENT

Water is one of the most basic necessities which are needed for cervical on the Earth. Water covers 71% of the total area of Earth. However, it is no secret that it is a struggle to find pure water in all this abundance, only 0.5% of freshwater is available to access. Thus, the technology advancements urged people to loom for alternative ways to acquire fresh water which can be used by them. Thus, several water treatments are done to make it appropriate for a specific end use. Water has to be disinfected in order to remove any microorganisms present in the water.

We provide chemical free technology h2O. Titanium AOP for Disinfection & Organic Impurities Removal

Waste water discharged from factories and Domestic is a pressing matter, it essentially impacts the bodies of water like rivers, ponds, lakes and makes them polluted and unfit for drinking and aquatic animals suffer on it's account too. Treatment may consist of chemical, biological, or physical processes or a combination thereof. Water may be treated to any level of quality desired. Waste water consists of many pollutants like bacteria, chemicals and other toxic substances. There are two wastewater treatment plants namely ETP, STP.

Wastewater treatment process is a multi tiered procedure which consists of primary, secondary and tertiary stages

WASTEWATER TREATMENT

STP BIO CULTURE

Enviozyme Aqua[®] S is a proprietary composite biocatalyst that enhances a broad range of hydrolytic, oxidative, and reductive biochemical reactions. Enviozyme Aqua[®] S Customized Natural Microbial / consortium of metabolically cooperative microorganisms, with endogenous and exogenous enzymes, Enviozyme Aqua[®] S products are composed of all-natural, non-genetically modified materials. Enviozyme Aqua[®] S accelerates the growth of MLSS & Reduce BOD, COD & Odor Control.

Unique biological formulation that is chosen for 100 % green technology to degrade the toxic organic components and improve water quality.

Enviozyme Aqua[®] E is a proprietary composite biocatalyst that enhances a broad range of hydrolytic, oxidative, and reductive biochemical reactions. Enviozyme Aqua[®] E Customized Natural Microbial / consortium of metabolically cooperative microorganisms, with endogenous and exogenous enzymes, Enviozyme Aqua[®] E products are composed of all-natural, non-genetically modified materials. Enviozyme Aqua[®] E accelerates the growth of MLSS & Reduce BOD, COD & Odor Control.

Unique biological formulation that is chosen for 100 % green technology to degrade the toxic organic components and improve water quality.

ETP BIO CULTURE

COMPOSTING BIO CULTURE

Enviozyme Aqua[®] CO Solid waste composting bio-culture is a microbial complex, bacteria, enzymes, micro nutrients and trace elements, developed specifically for converting organic solid waste into fertilizer. The product is highly efficient in consuming oxygen and readily soluble components of raw organic matter.

Enviozyme Aqua[®] CO Aqua operates as an effective Facultative Anaerobe allowing it to reduce the emission of Volatile Organic Compounds (VOC's). Operating aerobically, it can rapidly reduce organic loading that is the nutrient for odor causing bacterial strains.

FRP COOLING TOWERS FRP Induced Draft Counter Flow Cooling Towers :

The tower casing is manufactured from fiberglass reinforced plastic (FRP) so it is called FRP Cooling Tower which is highly corrosion resistant and gives sufficient structural strength, to withstand high wind velocity and vibration. It offers enough constructional power to stand firm against vibration and high wind velocity. Casing designed in sections properly matches at aerodynamic contours and works, which are accomplished for best performance. If you want to buy the best cooling tower, you need to visit the best and reliable Source.

Compact STP, Food waste,
Garden waste compost machine &
Chemical free swimming pool water treatment
(For Luxury Bungalows Residential Society, Hotels & Hospitals)

Enbiogreen provides very high quality
plants for luxury Properties.
The design of the plant is very
sophisated and plant with very high quality
components is delivered.
